Barry Babbitt

Orlando, FL | babbitt.barry@gmail.com | 407-451-3979 | linkedin.com/in/barrybabbitt1 | bbabbitt1.github.io/portfolio

SKILLS

Programming: SQL, Python, M, DAX, VBA, C#, Office Scripts, HTML, CSS, JavaScript
Cloud & Warehousing: AWS (S3, Lambda, DMS, Kinesis, ECR), Azure, Snowflake, BigQuery
Data Engineering: ETL/ELT pipelines, schema evolution, SCD1/SCD2, streaming data, data lakehouse, CI/CD (GitLab/GitHub)
Analytics & BI: Power BI, Power Query, Excel, Azure Data Studio, dbt, Erwin Data Modeler
Data Architecture: Star schemas, dimensional modeling, conceptual/logical/physical models, grain alignment
SQL Server: Relational modeling, CTE-heavy transformations, window functions, stored procedures, views
API Integration: REST API consumption, deeply nested JSON flattening (Python, C#)
Frameworks: Agile/Scrum, A/B Testing, canonical schemas (ISO 20022)

EXPERIENCE

Senior Data Analyst — BNY (Data Modeling & Governance)

Lake Mary, FL | March 2025 – Present

- Architected a centralized metadata and data-dictionary platform by integrating GitLab and SharePoint APIs, establishing a single source of truth across 15+ enterprise datasets and 2,000+ attributes.
- Designed relational metadata models linking datasets, attributes, schema versions, and certification status, enabling attribute-level lineage and schema impact analysis at enterprise scale.
- Built a CI/CD pipeline that validates, version-controls, and promotes documentation artifacts through environments, reducing schema-change turnaround from days to hours.
- Authored complex SQL transformations using multi-layer CTEs and window functions to construct analytical fact and dimension tables from heterogeneous financial sources.

Freelance Data Analyst & Data Engineer — Self Employed

Orlando, FL | March 2025 – Present

- Engineered a production data pipeline integrating Tekla PowerFab APIs (C#) with Python ETL workflows and AWS S3, automating ingestion of fabrication metrics into SQL Server for a steel manufacturing client.
- Delivered a Power BI dashboard providing leadership with historical production trends, improving operational decision-making around staffing and resource allocation.
- Implemented Type 2 SCD tracking with dbt + Snowflake across 2M+ records, supporting compliance and longitudinal analysis.

Senior Data Analyst — MasterCorp

Orlando, FL | October 2023 – March 2025

- Introduced and owned star-schema semantic models for finance, operations, HR, and legal; re-engineered core dimensions from Type 1 to Type 2 using surrogate keys and effective dating.
- Designed the company's first enterprise HR analytics dashboard, formally defining turnover metrics across siloed departments; insights contributed to a 25% reduction in turnover via a cross-functional initiative.
- Built an Operations Financial Overview dashboard integrating financial, operational, and merit-based KPIs across 200+ sites, with automated bonus-calculation logic aligned to real-time performance.
- Engineered a real-time Overtime & Scheduling dashboard for 5,000+ associates across 200 sites, using advanced DAX to shift overtime management from reactive to proactive.

Financial Planning Analyst — Raymond James

Orlando, FL | January 2022 – October 2023

- Automated capital gains exposure monitoring by integrating BlackRock's API with SQL-driven holdings data, uncovering $50M in avoidable distributions and directly supporting regulatory compliance.
- Developed and implemented 600+ data-driven financial plans in partnership with 100+ advisors, leveraging SQL to aggregate client data and ensure regulatory adherence.
- Scaled manual compliance review processes into automated, auditable workflows, strengthening regulatory exam readiness across the region.

Reporting Analyst — Universal Property & Casualty Insurance

Ft. Lauderdale, FL | January 2021 – January 2022

- Built SQL queries and stored procedures generating recurring operational reports on claims and underwriting performance for finance and compliance teams.
- Automated report delivery and validated outputs against source systems, improving accuracy across regulatory submissions.

Data Analyst & Assistant Coach — Rollins College

Orlando, FL | August 2018 – January 2022

- Built a SQL database centralizing player performance, TrackMan telemetry, and tournament data — enabling granular trend analysis across seasons.
- Optimized practice schedules using linear programming, increasing attendance by 50%.

EDUCATION

Bachelor of Arts in Mathematics — Rollins College, Orlando, FL (May 2017)

CERTIFICATIONS

- Microsoft DP-600: Fabric Analytics Engineer
- AWS Solutions Architect Associate
- Microsoft PL-300: Power BI Data Analyst Associate
- Microsoft AZ-900: Azure Cloud Fundamentals
- Google Advanced Data Analytics Professional Certificate
